Experience

NOAH Business Applications I Makati, Metro Manila 2024

As a Software Developer at NOAH Business Applications, I prepared over 20 test cases, tested 4 test cases, and reviewed 6 test cases for the company's application. I rigorously evaluated the rules and standards of all assigned menu items, enabling the development team to apply efficient solutions through meticulous testing and validation.

Academic Projects

LAYAG: Development of an Assistant Mobile Application for Lyceum of the Philippines University - Cavite

Leader/Database Manager/Lead Programmer
Collaborated as the team leader, database manager, and lead programmer within a 4-member team on the development of an assistant mobile application for Lyceum of the Philippines University - Cavite. Involved in the comprehensive programming and system development, leveraging Flutter, React, and Firebase as primary tools for both the mobile application and its Content Management System. The application features a Academic Calendar, a To-do list, a Handbook Viewer, Centralized Links, and a digitized book borrowing request system for the university library.
